This month let's explore Instagram!!

Instagram is similar to Facebook in that you share photos and videos that you would like others to see. You can also view, comment, and connect with other Instagram users. Instagram is more instant and can be uploaded quickly through your phone. All you must do is go to [instagram.com](https://www.instagram.com) and register and sign up. You do have to give a current email address, but you do not have to use your own name for your account except when registering. As you only have to be 13 years old to open an account on Instagram, you will find this site more diverse and used by young people. There are some things that you should know before posting on any social media:

- Only share photos and videos that you have taken or have permission to share.
- Only post pictures and videos that are appropriate for diverse audiences.
- Follow the law and respect others in the Instagram community

In other words, be kind, and be thoughtful before posting anything.

Using any social media will help your oxalate grow so let's get on board everyone and let me know when you have a page or website.

Hint #2- The Crusades

Thank you so much for the pictures that are being sent to me our man and President. Please keep sending them. Enjoy the rest of your summer. See you in the fall.
